Dell Studio Xps Pp17s Drivers For Windows 7

DOWNLOAD: https://tinurli.com/2il6kz

what is WIFI gigdude. Sid1monu, you need to find drivers yourself, for that machine. Sid1monu, what is your wifi card? bcm4311 Sid1monu: what operating system are you using? i need to find drivers for windows 7 Jordan_U, no, it is a manual config, it can be done on the server side thinkt510, windows 7 kreuger: all bcm-drivers work, just read the factoids !bcm Wireless documentation, including how-to guides and troubleshooting information, can be found at Sid1monu: you need to ask in ##windows Sid1monu: Sid1monu: this channel is for ubuntu support yeah, I figured that but the first thing I looked up when I saw it was not wifi, but lan (which in this case doesn't matter) thinkt510, #windows seems dead also, I don't think it is a duplicate Sid1monu: That guide was added because of Ubuntu's Wubi, which is "bad". The guide is completely outdated, and should not be used in any current installation of Ubuntu. Jordan_U, I appreciate your help, but I will continue to fight this one, as long as there is a way to make sure changes to the user's account can be rolled back Sid1monu: most likely they are asleep or in a different timezone, they'd answer a pm though llutz, so yeah. So what you're saying is you don't know of any way to add the apaprent name of the host to a host file? 82157476af
